THURSDAY, SEPTEMBER 9. Ir would be difficult to describe the intense eeling that has pervaded the community during Tr Dutch bark Mary Ann, from Australia for San Francisco th passengers, was to leave Tahiti August 17, in touch at the past two weeks caused by the suspense has over the action on the French Treaty. It could hardly have been more so had a des rthquake been expected. One day it is reted that the treaty is signed, the next that it isn't, and so forth. To cap the whole the Polyet August 12, reports the following ships on Kod ack: Aug 8, nesian comes out and with a perfect contempt of the public feeling, owns itself gagged, as follows: In view of the amount of interesting matter brought by the two mails which have recently arrived, and to make room for copious shipping intelligence, we withdraw the leader orepared for this week's paper. Of the political matters which have occupied the attention of the public during the last few days, we shall have our say at a more convenient opportunity. REPORT OF SHIP BROOKLYN, ROSE:-July 30, George, N B. ean : Aug 4, Jirch Swift, 1 whale and 2 mud-diggers ; 9th

THE PACIFIC

Commercial Advertiser.

What a collapse! The smell of that powder and the untimely appearance of the bright Imperial tri-color was too much for the nerves of the editor, and appears to have knocked all his steel pens into pi. The "interesting matter" proved under the circumstances, quite uninteresting, which was as much as to say that "the leader' had some remarkably dry points in it. However, the public appear to have come to the conclusion to bear up manfully under the circumstances and possess their souls in patience." till the fate of

the Minister's work is known. The gist of the whole matter is here. His Majesty has been unwilling to ratify the document with its obnoxious clauses, and his Ministers, who have more brass than ever Judas possessed, are determined he shall sign it in some form-as the only alternative of a general collapse in the Ministry. Immediately on its rejection by His Majesty on the 30th, it is reported that the Minister of Foreign Affairs essayed to bring about some such arrangement, by which it could still be signed. The period limited having expired, this could only be effected by attaching another artiele, remedying this default. We understand that the strictest secresy has been enjoined on the subsequent proceedings.

The position in which His Majesty has been placed is very like that in which the attempt to and the wants of whalers depend greatly on their annex the Islands to the United States placed him. The ratification of this treaty as it came from France will be a virtual cession of a portion of the Sovereignty of the kingdom to France. The Ministers may succeed in their unrighteour work, but not, if we understand Kamehameha

P.S. We have good reason to believe that the treaty was signed yesterday, and that the French. English, and Hawaiian versions, as ratified by the King, are now in the possession of the French Commissioner. Whether it has been modified, otherwise than alluded to above remeins to be seen. We are assured, however, that the provisions in regard to the use of the French language, and that enforcing the new tariff remain unaltered. We hope we may be mistaken in regard to this, and that whatever has been the final action of His Majesty, it may be such that neither he nor his people may regret it, nor wish

THE TREATY PASSED: Just as our paper was ready for the press, the Extra Polynesian was placed in our hands, containing the Treaty with France, as accepted by this government and passed yesterday the 8th inst. For want of time and space, we defer comments on it till our next issue. It will be noticed, however, that it is not the same as came from France, or rather that it is amended and has not the Emperor's signature.

The Whaling Fleet and Whalers' Bills.

Several weeks ago, when noticing the first news received from the Kodiack, we ventured to prediet that the whaling season at this port would begin somewhat earlier than in former years. Already fifteen vessels have arrived at this port and Lahaina. The fact that the ships which cruised last season on the New Zealand ground did well, has had a tendency to basten the departure of some vessels from the Kodiack Sea as soon as the whales became scarce, and may also bring some from the Arctic, so that ships intending to cruise on New Zealand may be able to reach that ground in season, whales being most abundant there from October to February.

The reports which we publish to-day from the Arctic are very unsatisfactory, though early in the season. The season in this sea is from July to September 30th, and it is very likely that the month of August may change the character of the reports. Capt. Lowen's report shows a larger number of vessels in that sea than was generally supposed. As near as can be determined from reports received, the northern fleet has been dispersed as follows:

On Kodiack Ground, about 40 vessels. In Bhering and Arctic Sess, about 75 do. In Ochotsk and neighboring Seas, about 100 do.

From the latter fleet no report has yet been received, and we are justified in allowing the above number to it. In another part of-this paper will be found a complete list of the North fleet of whalers expected here this fall, numbering in all 233 vessels, including one known to have been lost.

Up to the 6th inst., we have had fifteen arrivals from the North. The same number did not arrive last year till the 6th of October, or one month later. The first fifteen arrivals this season report 7,450 bbls, this season's catch, or an average of 497 bbls. to each vessel. We give below the average for the first fifteen whalers from the Northern ground for the three previous years :

The early return of the Kodiack fleet in 1856 which had done poorly, somewhat resembled this season's report. In 1857 and 1855, the early arrival of some large fares from the Arctic and Ochotsk, makes the average given above appear large. To say the least, the reports thus far this year look somewhat discouraging, and we can only hope that the next will be better.

In our reports of the Arctic fleet, it will be seen that some vessels are reported with "ripsacks" and "muscle-diggers." These are the same species as are found in Margarita Bay, and are also called "California greys." They are a small whale, and average about twenty-five bbls. each. Their oil is said to be inferior to that of the Arctic whale. The only vessel reported lost thus far, is the French ship Napoleon, lost in May, near the Bhering Straits. A number of vessels have been damaged by the ice.

The report of Russian interference with our whaling fleet again comes to us, but until we receive more definite information than has come to hand, we can place but little reliance on the reports. Capt. Pontius, of bark Caroline, from Kodiack, informs us that the whaleship Contest had been boarded by a Russian man-of-war steamer, (probably the Vostock, the same vessel from which the story emanated last year,) and had been warned from trading with the natives for furs, and from whaling within a distance of three leagues from the shore. The Captain of the steamer inform Captain Ludlow that the Russians had quite a number of war vessels in the Ochotsk Sen, and intended to prevent American whalemen from eatching whales in the bays on the Siberian coast. The steamer mentioned was bound to the Ochotek, and from thence into the Arctic Ocean. Had there been any decided inbly have had, before this, the return of some whalers from thence on that account. It may not be amiss if we here say a few words

on the subject of exchange. Formerly, when communication with San Francisco was less regular than it is now, and money could not be ob-tained there of may terms, while the northern leets were much larger than at present, the rate of premium on money or discount on whalers ills was excessive, and rose at times to fifteen and even twenty per cent. But each succeed has been working a change in favor of the whaleships, and now, with a little foresight on the part of ship agents and ship chandlers, and with the accurate knowledge of the number of shins expected, derived in part from the publication of a list and early reports, the amount of money wanted by them can be correctly estimated, and arrangements made to supply all they need, be it more or less. Although the premium on monev last fall went up to ten per cent., the average on all the bills drawn did not exceed five per cent., and was probably between four and five.

It has been customary with some who have a few thousands at their command, to hoard up their money for months with the hope of obtaining, as in former years, a heavy premium on it when the whalers come in. The idea that they may get twelve and a half or fifteen per cent., or even a higher premium, tempts them to decline a moderate offer for their coin, and they hold on to it till they find the "bank broke," and their anticipated profits a vision. We doubt not that from fifty to a hundred thousand was so kept back last season, till the owners of the money were fain to accept par, if for remittance, or seek some other investment, if held solely for profit.

The season has probably passed by when any great profit can be made here in whalers' bills. The amount of money awaiting remittance to the United States, England and Germany, as well as the large amounts imported from San Francisco, (this latter varying from a hundred to a hundred and twenty-five thousand dollars,) precludes the possibility of any scarcity in the money market this fall. In addition to this, the average catch will probably be less than in any former year,

No one should hoard his money for a season of scarcity. If any have funds to remit or to invest, they should be placed in the hands of a ship chandler or any one likely to invest them at the best rates. Whalers bills are unquestionably the best remittance ever offered. During all the last year's panie only one or two houses engaged in the whaling business in Atlantic ports, suffered their bills to be protested. The nature of the business is such-the ownership of whalers being divided among a greater or less number of shareholders-that these drafts are probably safer than the same amounts drawn on or by any other class of business men in the world.

NOTES OF THE WEEK.

Loss of SHIP WILD WAVE, OF BOSTON, 1550 TONS. CAPT. KNOWLES -Left San Francisco Feb. 9, 1858. bound to Valparaiso. Had easterly winds after leaving San Francisco, which forced the ship to the westward, beyond the usual track. On the night of March 4th, about one o'clock, steering south, discovered breakers on the lee_bow, attempted to go about, when the ship misstayed, and in waring struck on a coral reef, which by observation the next day was found to be in lat. 24° 01' S., long. 130° 53' W. The reef surrounds an island set down on the chart as Oeno, placed in long, 130° 35'. In the morning effected a landing on the island, which was a low lagoon island with a small growth of brush-wood, but no inhabitants. Soon after the ship struck she bilged, and lay over on her beam ends, the surf breaking over her. Saved a few provisions, instruments, &c. Remained on the island ten days, during which time, owing to the heavy surf, was not able to board the ship only two days. About March 14th captain, 1st officer and five men left the island in a life-boat, and proceeded to Pitcairn's Island, about 75 miles distant, with the hope of falling in with a whaler. On arriving at Pitcairn's, experienced great difficulty in landing, had the boat stove in the breakers, and found the island destitute of inhabitants, these having left for Norfolk's Island two years previous. Found wild goats and some vegetables growing on the island, upon which they subsisted four months. During this time, with some old tools which were found among the deserted habitations, they constructed, with great labor a boat about thirty feet in length, fastened partly with wooden pegs and partly with iron, in which, having succeeded in launching her on the 23d of July, Capt. Knowles, the 1st officer and two menembarked from Pitcairn's Island for Tahiti, three men preferring to remain. Met a heavy gale from the N. W., which, lasting three days, forced them to steer for Nukahiya, Marquesas Islands, where they arrived on the 4th August. There they found the U. S. S. Vandalia, Capt. A. Sinclair, who at once received them on board and set sail for Oeno via Tahiti, leaving Papeete Aug. 12. Capt. S. and officers treated the shipwrecked party with true hospitality and made all expedition in proceeding to the rescue of those who still remained at Oeno, numbering thirty-one persons, all told. At Tahiti Capt. Knowles remained on shore. the first officer proceeding in the Vandalia to the

Eurydice, Capt. Pichon. THE RIFLES .- An election was held on Saturday evening last, to fill the vacancy caused by the death of Capt. Coady. The following officers were chosen: Captain, John H. Brown; 1st Lieutenant, Thos. Spencer; 2d Lieutenant, M. Brown; 3d Lieutenant. E. J. Smith. The other officers remain the same as heretofore. Mr. Smith's promotion from the ranks. by a unanimous vote, to fill the office of third lieutenant, reflects credit on his skill and tactics as a citizen soldier. The Company turned out yesterday for the first time under their new officers, and engaged in target practice. Three different ranges were tried. of 100, 150 and 200 yards distance, when Sergeant W. R. Seal was declared the winner of the silver medal, this being the third prize which that gentleman has gained in company practice. On returning from the target practice, the corps marched through some of the principal streets before returning to their

wreck of the Wild Wave. From Inhiti Captain

HAWAIIAN HONEY .- We are indebted to Dr. Hillebrand for a plate of delicious honey-probably the first specimen of Hawaiian-made honey that has ever been exhibited. It is not a bit inferior in color or taste to the best imported, while the wax possesses a superior whiteness. The little workers are now fairly climate they have experienced, but work on busi from daylight to sunset, as though the winter was close at hand. His Majesty has among his subjects none more industrious or loyal than these little foreign emigrants, and they are a lesson to us all.

DOMESTIC CHEESE.-Hardly had we passed our udgment on the plate of honey, before we are called to decide the merit of some cheese made and sent to us by Mrs. Pickford, who presides with so much credit over the dairy of Little Greenwich, Mr. Booth's pleasant villa. We can only say it is ne plus ul'ra, and its rich aroma reminds us of our boyish days, when sweet yellow cheese was among the realities of every day life, and not, as is too often the case here, een only in dreams. Mrs. P. has been very successful in overcoming the obstacles frequently met in our climate in the manufacture of cheese, and those whose love for home-made cheese has not been changed by a constant use of the caustic imported article, can doubtless procure a supply as above.

FAREWELL Source to Gan. Millen .- Their Maje ties the King and Queen gave a farewell Levee to H. B. M.'s Consul General, William Miller, Esq., last evening, at the Palace, on which occasion the and Miss Miller took their leave of the Royal Far ference with the movements of American and the Diplomatic Corps, who were present by spealers, in either of those seas, we should proba- cisl invitation.

Francisco. We learn that he will probably give one or two concern here previous to the salling of the Vanker, by which vessel he takes passage. We note. ing Colonial papers. One paper says in speaking of his performances: "Hands clap, feet stamp, attitump—Stephens has come on. An anticipatory machinestion greets him ere he opens his lips, and a fresh burst follows whenever he speaks or moves; for as he wriggles, cel-like about the stage, he seems a oke in breeches an incarnate grin-his very legs augh." We premise that a crowded house will greet Mr. Stephens, should be conclude to give an enterant during his stay here.

ertinacity to many of their ancient superstitions, but o none more so than to the belief in the magic power of the kahunas. These are generally (though not always) old and decrepid men, blear-eyed and repulsive—the more so the more awe they inspire. At nstance occurred the other day in which one of these fellows compelled a whole family—father, mother and six children-to pack up and leave Honolulu for Hawall, on pain of being "prayed to death." Some might conclude that it was a harmless use of power in this instance, but they do sometimes actually kill with fright those upon whom they operate. The law is strict in regard to such practices, but law cannot always reach them.

any way lucky, in being dressed in span new broadcloth with standing shirt collars. Not unfrequently too, they are surrounded by a crowd of bogus relations and makamakas, who perform the part of land-sharks as long as Jack's money lasts, and come in for a share, often the largest, of his advance when he ships again. Could this class of Hawaiians be inthere is such an institution and explain its benefits.

HOOK AND LADDER COMPANY .- At the regular officers were elected for the ensuing year :

Assistant Foreman, A. E. K. Burnham. Secretary, C. N. Spencer. Treasurer, E. J. Smith. Delegate, R. E. Wakeman.

It was stated that the Company was in debt some where about \$100, and it was voted to endeavor to procure subscriptions for the purpose of liquidating that amount, and also to procure a library for the Company's room. The Company numbers about 30 men, and would undoubtedly do good service if called upon. We hope their appeal to the liberality of the public will be promptly met.

RAILROAD ACCIDENT .- Last Tuesday the track on the new esplanade broke down under the weight of a heavy loaded mud car, which tumbled into the soft compound, burying three or four of the prison gang quite out of sight. They were liberated from their living graves as soon as possible, but three, two natives and a Chinaman, were taken up quite insensible and apparently dead. They were carried to Dr. Ford's shop, where an examination showed that no bones were broken, only the breath squeezed out. This last they gradually recovered, and were taken to the prison at Leleo, not really injured, but badly frightened and mired. This is the first "railroad catastrophe" we have had to chronicle, but it will be observed that we are progressing in the arts of civili-

self to other important issues, the chief of which is war. That Napoleon III. meditates immediate hos-Another Blast.—Another discharge of powder was made on the rock at the west end of market but there seems to be some dispute as to which par-ticular one. The French people hve been somewhat relieved by the dismissing of General Espinasse from the Portfolio of the Interior, and the establishment of Wharf on Tuesday. A number of spectators stood on the wharf at the moment of the explosion, which, as it would be under water, no one thought of fearing. But the blast was so powerful that a large body of water was raised by the concussion, and the old on the part of the Emperor, and the lull consequent on the change has give him the time required to complete his preparations. At an immense cost, and wharf on the side next the explosion was tipped or canted ten inches, causing a hasty stampede on the by dint of a series of the most laborious constructions, the port of Cherbourg has been mad one of the finest part of those standing on the planking. The process of laying the stone wall is rapidly carried on by the native divers and will soon be completed on war, and transports, have been concentrated at that port, immediately opposite the coast of England. Large additions have recently been made to the army. the front. They are at present at work in twenty

THE HAVANNAH-sails to-day for Valparaiso. H. B. M.'s Consul General Wm. Miller takes passage her, with the hope of benefitting his health, which has become much impaired. During a residence of many years here, he has given the greatest satisfaction not only to the government which he has represented, but to this government, and we only express the unanimous opinion of his countrymen and the residents of Honolulu, when we say that few men could have obtained more general respect, or succeeded to a greater degree in maintaining the dignity and honor of the British nation in this kingdom. We part with him with many regrets, and pray that his health may be fully restored, and that he may be enabled to return soon and resume his official duties. We would call the attention of his friends to a card in another

Knowles came to Honolulu in the French corvette with a choice variety, suited to every taste. Harper's sparkles as usual with illustrations of superior merit, and richly deserves the popularity it has long received. The Atlantic Monthly maintains its position. as the highest literary publication of America. Its articles are the choicest productions of some of the most eminent authors of New England. These magazines can in no sense be called rivals, as they are adapted to the tastes of different classes of readers. They should be taken by all who desire to be well posted on the current literature of the day.

from France concur in stating that the Emperor's precarious tenure of the throne, cannot be much longer NAVAL-The following is a list of the officers of H. I. M.'s corvette Eurycice, which arrived at this of his Army, who boiling over with military ardor, clamor loudly to be led somewhere, against somebody, no matter who, provided their thirst for military glory be satiated. The question therefore is, which of the two to choose, England or Austria? Aroused and on the watch, as she is, England would inevitable defeat any attempts and the restriction of the control of the same are said on the watch, as she is, England would inevitable defeat any attempts and the control of the control port from Tahiti on the 3d instant, after the very good passage of sixteen days. We understand that she will make a somewhat protracted stay at this

The Market Stall-

MR. EDITOR :- Ip your last week's paper I notice that you announce that the makai end of the stone market has been fitted up by an enterprising citizen for a butcher shop. As I understand that the place has been leased for a year, I would inquire whether the law does not provide that those stalls shall be let every quarter at public auction. It is quite easy for any one to be enterprising, etc., if they are granted Yours, &c.,
